Details: The Rogue Area Drug Enforcement Team (RADE) executed a search warrant at the listed location based on an on-going investigation into the sales and possession of illegal narcotics from the residence. In addition to numerous complaints about the location, a GPDPs patrol officer made an arrest the day prior, of a subject related to the Cloverlawn address, which was the basis for the search warrant. Due to the seriousness of the criminal activity, RADE requested the Grants Pass DPS SWAT team make the initial contact with the residents. After the residence deemed safe for investigators, a search of the residence took place.

Details continued:

A large quantity of Methamphetamine and heroin as well as scales, packaging material, cash and other evidence related to the sales of each drug were located. Of note, three (3) firearms were seized and a Butane Honey Oil (BHO) lab was dismantled. Detectives located several ounces of BHO that had been made/processed at the location. Cloverlawn Dr. was shut down for approximately 30 minutes while the operation took place. In all, 5 people associated with the residence were taken into custody. Additional charges for others contacted at the residence will be evaluated by the Josephine County District Attorney's Office.

The investigation is ongoing and anyone with information or questions is asked to call 541-955-6379.
